PROFESSIONAL EXPERIENCE

Associação dos Funcionários Fiscais de Minas Gerais (AFFEMG)

Software Engineering & IT Support Intern

Belo Horizonte, MG, Brazil | 2025 – Present

- Optimized SLA and mitigated response times for Tier-1/Tier-2 support tickets by developing an internal ticketing platform (**currently active in production with daily usage**) using **React**, **Tailwind CSS**, and **Supabase**; orchestrated automated **CI/CD** pipelines via **GitHub Actions**, containerization with **Docker**, and an **Nginx** reverse proxy.
- Boosted corporate engagement and internal communication by designing, implementing, and deploying the **VivaBem** internal social network, actively adopted by employees; built the backend using **Node.js** and **Express.js** with custom authentication middlewares, and optimized relational queries on **SQL Server**.
- Reduced production incidents and infrastructure maintenance overhead by mapping and establishing operational IT playbooks, standardizing technical documentation for corporate hardware, software, and networking systems.

PROJECTS

EDEN – Full-Stack E-Commerce Platform | <https://eden.mubadev.com.br>

Java 21, Spring Boot, Spring Security, JWT, PostgreSQL, React, TypeScript, Docker, Nginx

- Ensured high scalability and domain isolation by architecting a decoupled, **stateless RESTful API** with **Java 21** and **Spring Boot**, enforcing role-based access control via **JWT/Spring Security**, centralized global exception handling (`@RestControllerAdvice`), and persistence using **Spring Data JPA** over **PostgreSQL**.
- Maximized checkout conversion rates and eliminated UI blocking by building a modular frontend client with **React** and **TypeScript**, implementing dynamic product catalogs with robust **global state management**, strict typing, and proactive form validations.
- Mitigated network latency and optimized static file delivery by orchestrating a containerized environment via **Docker Compose** and configuring **Nginx** as a reverse proxy for secure traffic distribution.

Enkephalos – Study Management & Productivity System | <https://enkephalos.mubadev.com.br>

React, TypeScript, Tailwind CSS, LocalStorage, IndexedDB, Markdown Parser

- Optimized knowledge retention by automating predictive review scheduling through the mathematical transposition of **Ebbinghaus' Forgetting Curve** into dynamic **Spaced Repetition** algorithms.
- Guaranteed continuous offline availability by implementing client-side analytics dashboards, an integrated Pomodoro timer, and a native Markdown parser compatible with Obsidian notes, utilizing 100% **client-side persistence (LocalStorage/IndexedDB)**.

EDUCATION

Pontifícia Universidade Católica de Minas Gerais (PUC Minas)

Bachelor of Science in Software Engineering

Belo Horizonte, MG, Brazil | Expected Graduation: December 2028

Instituto Federal do Norte de Minas Gerais (IFNMG)

Associate Degree in Information Technology (Integrated Technical High School)

Almenara, MG, Brazil | 2022 – 2024

TECHNICAL SKILLS

Programming Languages: Java (21), TypeScript, JavaScript, SQL

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, React, Node.js, Express.js, Tailwind CSS

Databases: PostgreSQL, MySQL, SQL Server, MongoDB

DevOps & Infrastructure: Docker, Nginx (Reverse Proxy), Git, GitHub Actions (CI/CD), Linux

Concepts & Architecture: Clean Architecture, Clean Code, SOLID Principles, Design Patterns, RESTful APIs, JWT, Agile/Scrum, JUnit
